WERTH HOSPITAL CART

EFFICIENT AND ERGONOMIC MOBILE WORKSTATION

Avedon Hospital Cart has a powerful and fanless Medical-PC and a durable (rugged) Medical display. These are installed on the Ergotron cart cordless System which has a powerful battery that lasts more than 12 hours during the doctors' patient rounds.

WERTH HOSPITAL CART

Werth Hospital Cart 1

The Werth hospital cart is intended for doctors' daily patient rounds. The hospital cart is a turn-key package, which components are selected in compliance with EN60601 certificate. The doctors' rounds are also made in the critical treatment areas, with sensitive medical equipment. A link to patient databases is ensured by a Dual-band Wlan-antenna and it's optimal placement ensures the best possible signal levels.

Good hygiene and cleanability are default properties of the Werth hospital cart. The hospital cart's hygienic materials can withstand the most common types of Hospital cleaners. A holder for a 500 ml disinfectant bottle is installed on a holder for ensuring personal hygiene.

Werth Hospital Cart 2 – Customizable

The hospitals have a lot of different types of departments and their needs can be very different. Also the budget can be a limiting factor for a desirable long life cycle. The hospital cart is an important tool for the staff, thus the different demands must be taken into consideration.

Werth hospital cart is fully customizable according to customer wishes. A separate medical-PC can be placed in the storage box and the display can be changed according to requirements. You can have even two displays.

Almost all the wishes can be taken into consideration.

Regarding hospital treatment areas EN60601-1, EN60601-1-2 or the Office standards will be taken into account.
