Remind you to disinfectate

The JC-88 Keyboard has a high quality Silicone Housing which is highly resistant against Alcohol, Bleach, Blood, Disinfectionliquids, Solvent, Saltwater, Acids, Abrasive and Alkaline Materials. In combination with the adjustable CLEANREMIND function, which can remind you to clean the keyboard periodical and the grooveless Full-Flat Surface, it reduces the risk of a Cross-Contamination.

The SMART-MED JC-88 medical keyboard combines the functionality of a office keyboard with the optimum of hygiene requirements at the same time. And it combines high quality with cost efficiency. Based on this fact, the JC-88 is equipped with very longlife Gold/Silicon Switches with more than 3 Million actions per key.

The SMART-MED keyboards are antimicrobial and fungistatic and prevent the growth of fungi, mold and spores and are made of non-acidic and safe materials.
